

IMPACT WRENCH

RR-16N T 1/2" / RR-18N T 1/2"

LIGHTWEIGHT IMPACT WRENCH WITH LIMITED TORQUE

These composite impact wrenches by RED ROOSTER have an excellent weight/power ratio. They are especially developed for the tire shop applications. The Twin Hammer impact mechanism gives high energy levels per impact and is thus suitable for heavy duty applications. The energy is directly transmitted to the anvil for maximum power and low maintenance. The tools are limiting the tightening torque to 90 Nm for wheel nut applications, so overtightening is history! Full power available in loosening direction. Always use the torque wrench to check the torque!

CHARACTERISTICS:

- Ergonomic design, well balanced
- Compact and lightweight
- Impact mechanism Twin Hammer
- Exhaust silenced, through grip

**NO MORE
OVERTORQUE!**
