

Yokota

TORQUE-CONTROLLED IMPULSE TOOLS

Sizes

9 different YEX tools.
5 multichannel YETC-210 controllers, 32 different torque levels and a long socket selector box for 32 different sockets.

In use by:

A big manufacturer of Earth Moving Equipment in Belgium

Advantages for this customer:

These tools offer the documentation of the tightenings made, necessary in order to improve quality of the end-product and reduce cost of warranty-cases worldwide.

The fact that these tools are free of reaction forces enables the customer to produce with greater flexibility, not in the least because there is no need of clamping and supporting of the tools.

Tightening applications on:

Hydraulic valve blocks and gearboxes

Conclusions:

- Accurate tightening
- No reaction forces
- Documentation of the joint
