

TORQUE-CONTROLLED IMPULSE TOOLS

Sizes

System Wrenches YEX-701
and YEX-901 with
controller YETC-210EA

Target Torques:

36 and 43 Nm.

In use by:

Seat-manufacturer for cars in Hungary

Advantages for this customer:

The customer needs to have very fast tightening (very short takt-times) but must still document all tightenings for the car manufacturer.

By using the Yokota System wrenches the productivity is high and there is no more need of checking the torque in every joint after the tightening process.

The controller is connected with the line-control system to assure Zero Fault Production.

Tightening applications on:

Safety critical joints in the seats,
joining the back rest to the seat.
