

MOBILE AIR PREPARATION KITS

Do you use your air tools with a mobile compressor and wish to optimize the air?

Rami Yokota offers you a clean solution to extend the life cycle of your tools significantly. An SMC air treatment unit makes sure the air is filtered, has the right pressure and lubrication is added. This prevents water and dirt contamination entering the airmotor and extends the lifetime of the air tool and prevents the loss of power.

Please make sure, before you use your tool:

- Dynamic air pressure is maximum 6,3 bar
- Maximum hose length after the lubricator is 8 metres

The sets are equipped with claw couplings and a stainless bracket.

Type	Port size	Brand	Max. airpressure (MPa)	NI/min	Working pres. (MPa)	Filter (µm)
KIT-AC40F04E	1/2"	SMC	1	2.200	0,05 - 0,85	5
KIT-AC50F06E	3/4"	SMC	1	3.000	0,05 - 0,85	5
KIT-AC50F10E	1"	SMC	1	3.500	0,05 - 0,85	5
